Steel Strong Future Ready.

Built on over 30 years of
combined industry expertise.

Trusted by builders, architects and developers, Cedar Steel delivers structural steel fabrication solutions across residential, commercial and industrial projects throughout NSW.

Built on experience.

Driven by precision.

Family-owned and operated, Cedar Steel is backed by more than 30 years of industry experience, supported by a practical understanding of project requirements from design through to installation.

With a reputation for precision, responsiveness and reliable delivery, Cedar Steel delivers a full-service steel solution across design, drafting, fabrication, surface treatment, delivery and on-site installation.

(Residential Projects)

End-to-End Steel Fabrication

Custom design and fabrication services for residential, commercial and industrial projects.

Supported by advanced 3D technology, our service offering spans detailing, drafting, fabrication, surface treatment, delivery and installation.

Planning, Drafting & Design

Our drafting services use advanced 3D technology to improve coordination, clarity and buildability across each stage of delivery.

- Detailed drawings for all components
- Shop drawings and erection plans
- 3D sketch templates for RFIs
- Isometric details for complex connections

Supply & Fabrication

In-house fabrication of structural steel components tailored to project requirements, with a focus on accuracy, efficiency and installation readiness.

- Universal beams and columns
- Hollow sections (SHS, RHS & CHS)
- Angles, flat bars and cleats
- Australian-sourced steel
- Supply chain reliability

Surface Treatment

Protective coating solutions to suit project requirements, environmental conditions and durability needs.

- Zinc phosphate primer for corrosion protection
- Powder coating – UV & scratch resistance
- Hot dip galvanising for protection in harsh environments
- Hot zinc spray for added longevity

Delivery & Installation

From packing and transport through to on-site installation, we manage the final stage of delivery with a focus on safety, timing and professional execution.

Confidence from design to delivery.

From technical support and drafting through to fabrication, delivery and on-site installation, Cedar Steel brings the capability, responsiveness and reliability projects depend on.

Proven Industry Expertise

Backed by more than 30 years of industry experience, we understand the technical, practical and delivery demands behind every project.

End-to-End Delivery

From technical support & 3D drafting through to fabrication & installation, we manage the full steel scope with clarity and control.

Advanced Fabrication Technology

Advanced robotic coping technology supports greater cutting precision, consistency and efficiency across fabrication.

Tailored Project Solutions

We tailor our service approach to suit project scope, programme, build methodology and site conditions

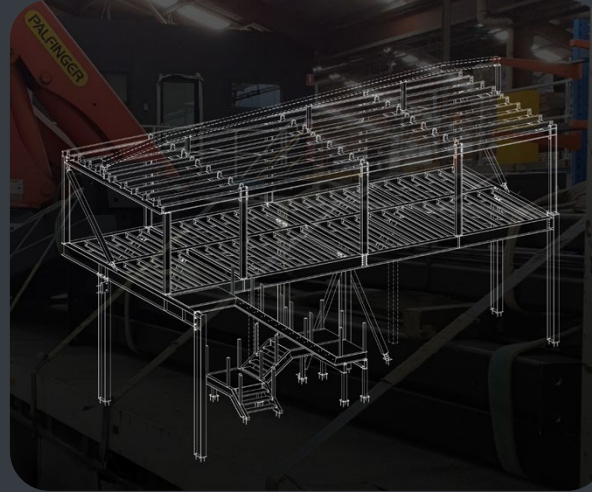

Residential Projects

Structural steel solutions delivered for custom homes, extensions and residential builds with a focus on speed, accuracy and site readiness.

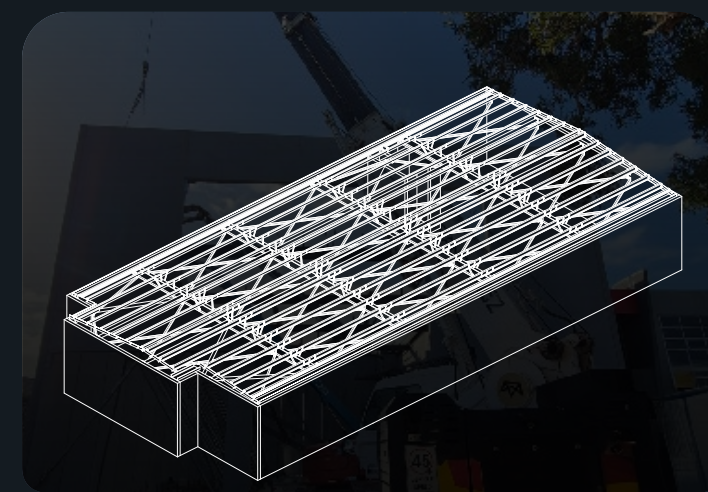

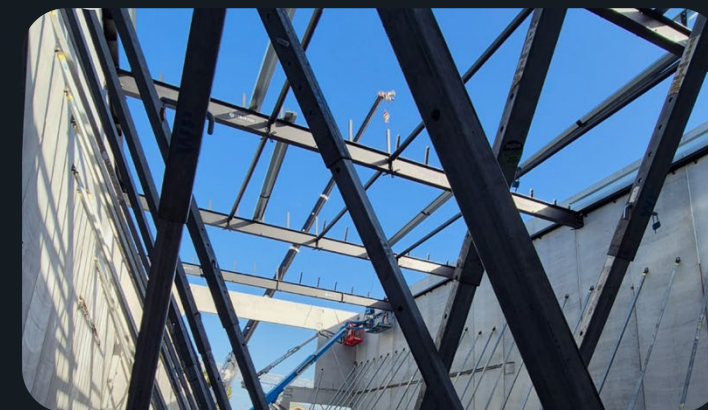

Commercial Projects

Commercial steel solutions delivered with a focus on coordination, buildability and dependable project execution.

Industrial Projects

Industrial steel solutions designed for demanding environments, practical buildability and efficient installation.

Proven on site. Trusted in delivery.

"From the moment I asked for a quote, through to installation the professionalism is second to none."

Ray and the team were a pleasure to deal with. I will be using them again in the future. Highly recommend giving the team a call for your project."

- AJ

"The team at Cedar Steel are great to work with. They are a professional company. We've worked together on multiple jobs now both supply only and supply and install. Steel is delivered on site on the date promised."

When installation is requested, they provide first class service. They are definitely the one stop shop. Happy to continue working with them on many more projects."

- John Dagher

"We have used Cedar Steel for our last three commercial and residential projects in Sydney and regional NSW."

I have found their service and reliability to be fantastic and would highly recommend them."

- Adam Horner

"From start to finish of the project, the team at Cedar were an absolute pleasure to deal with."

Very quick turnaround, highly detailed shop drawings and Joe from their installation team had great attention to detail. Highly recommend for any steel fabrication projects."

- Aaron Hall
